

Do you have a topo survey of the existing field and proposed elevations of the new parking lot? Without this information we are unable to calculate an accurate dirt haul off for the project.

No, the project is defined in the picture as presented and covers the area between the street and sidewalk between Gilboa and Gideon.

Do you have a marked-up image the shows the exact footprint layout for the new parking lot, striping layout, landscape removals, existing utilities?

Nothing other than what was provided.

Is there fence removal and/ or reinstallation with this bid?

No

Looking at a street view it appears this field slopes from the street up to the building, this is going to require variable depth excavation to allow for smooth transitions. Proposed grades would be helpful.

There won't be any grading for the parking area as described as it falls between the street and sidewalk. There will be grading required for the area just west of the new sidewalk.

Any other information you might have would be very helpful.

You are welcome to schedule a site walk to better understand the scope of the project.

I am inquiring to ask if there is a construction cost estimate or budget associated with the Zion Police Department Parking Lot Improvements Project.

In addition, the city's website lists the last day for questions is 7/23/25 and the due date is 6/30/25. Is this correct?

Thank you for your inquiry, I do not have a proposed budget. I have a rough idea of the potential cost.

I believe the final date for questions should list 6/23/25 not 7/23/25 and will have the website corrected.
